

The following are the Building Surveying courses/programs that align with the competencies and/or university benchmarks of the National Accreditation Framework (NAF) and meet the educational requirements for attaining accreditation with the Australian Institute of Building Surveyors (AIBS).

Provisional Accreditation applies to a course that has not yet produced graduates and/or is subject to additional course review, although graduates are **still eligible for AIBS accreditation**.

If an accredited course (provisional or otherwise) is subsequently removed from the below listing, those enrolled during the period of the course's accreditation will still be eligible for accreditation provided they complete the course within a reasonable timeframe. For further information contact the AIBS office.

The AIBS is not responsible for the availability of these courses. Please enquire with the relevant Tertiary Education Provider.
